## Profile Summary

---

Senior Frontend Developer with 4 years of experience in building **scalable SaaS applications** using **React.js, JavaScript, Redux and REST API integrations**. Experienced in **frontend architecture, performance optimization, reusable functional components, complex state management using Redux**. Familiar with Node.js, PostgreSQL, Prisma and backend development concepts.

## Technical Skills

---

**Frontend:** React.js, JavaScript, Redux, Tailwind CSS, REST APIs, Responsive Web Design, HTML, CSS

**Backend:** Node.js, PostgreSQL, Prisma

**Tools:** Git, Bitbucket, VS Code, Codex AI

## Work Experience

---

### Senior Frontend Developer | Quick Live Solutions

Aug 2022 – Present

- **Led a team of 3 developers**, fostering collaboration, mentoring team members and ensuring the timely delivery of scalable SaaS products.
- **Integrated 50+ REST APIs with JWT authentication** into React applications, ensuring seamless data flow and efficient client-server communication.
- **Optimized page load times by 40%** using efficient code splitting, **lazy loading** and **memoization techniques (useMemo, useCallback)**, significantly **improving rendering performance**.
- **Collaborated with backend developers to design REST API** contracts and implement secure JWT-based authentication flows.
- Developed reusable React components and implemented Redux for scalable state management, improving maintainability and code reusability.

## Projects

---

### Spire Essentials (A Software as a Service (SaaS) solution) | Frontend Development

<https://essentials-dev.spire.solutions>

- Developed a comprehensive **Customer Relationship Management (CRM) and inventory management system** to streamline **products, parts, invoicing and daily business operations**.
- Implemented **role-based access control (RBAC)** for secure user management.
- Developed features for invoice creation and streamlined day-to-day business operations, including adding and managing co-workers, members and clients.
- **Optimized API Calls, resulting in a 30% reduction in latency and faster data processing.**

### RBCE (Inventory Management System) | Frontend Development

- Designed and developed a streamlined inventory management system focused on tracking and managing products and parts.
- Ensured efficient stock management with a user-friendly interface for handling inventory related tasks.
- Optimized page load times by 20% using efficient code splitting.
